

ONGROFOL® Jumbo

ONGROFOL® JUMBO stretch films manufactured by Ongropack Ltd. are fully in compliance with the relevant European directives. At determining the product composition, EC regulation No. 10/2011 on plastic materials and articles intended to come into contact with food was taken into consideration. Accordingly, our product is suitable for packaging of alimentary products in X2 and X3 food categories.

We recommend this product type for making handwrap and catering type films for household use. The film can be rewound easily and foldlessly even at a high speed on various types of rewinding machines.

The rewound film is suitable for manual wrapping of various alimentary products such as cheese, various types of meat, bakery products and fruits.

Besides of the traditional natur colour **ONGROFOL® JUMBO** type films are also available in champagne, salmon and lilac colours. Despite of the base colours the film has excellent transparency, thus the wrapped product is well visible under any circumstances. Owing to its excellent mechanical properties, the film can be easily and economically applied for alimentary products of any shape. The film is available in a wide range of sizes with different parameters of thickness, width and length.

ONGROFOL® Jumbo

Technical parameters

Parameters	Unit	Value
Width	mm	285-450
Thickness	µm	9 - 12
Length	m	3000 - 6000
Core size (internal diameter)	mm	76

Advantages

- > multipacks
- > excellent grip ability, flexibility and transparency
- > high mechanical strength
- > different color shades and a wide range of sizes
- > well fit to the packaged product
- > easy winding and rewinding

Application

- > rewinding
