

ONGROFOL® Converted

ONGROFOL® CONVERTED stretch films manufactured by Ongropack Ltd are fully in compliance with the relevant European directives.

At determining the product composition, EC regulation No. 10/2011 on plastic materials and articles intended to come into contact with food was taken into consideration. Accordingly, our product is suitable for packaging of alimentary products in X2 and X3 food categories.

ONGROFOL® CONVERTED type stretch films are suitable for household manual wrapping of various cheese types, meat, fruits and bakery products.

Owing to its excellent mechanical properties, the film can be easily and economically applied in our households for alimentary products of any shape. Owing to its elasticity, the film fits perfectly the wrapped product under any circumstances.

Besides of the traditional natur colour, **ONGROFOL® CONVERTED** type films are also available in champagne, salmon and lilac colours. Packaging can be solved in refill boxes, cutterboxes and also in bulk pallet boxes.

The film is available in a wide range of sizes with different parameters of thickness, width and length.

ONGROFOL® Converted

Technical parameters

Parameters	Unit	Value
Width	mm	285-600
Thickness	µm	9 - 12
Length	m	200 - 500
Core size (internal diameter)	mm	33 ,38, 40, 50

Advantages

- › wide range of size
- › standard and customer specific packaging
- › high transparency
- › variety of colors
- › good adhesion and elongation properties
- › high mechanical strength
- › wide range of applicability
- › easy to handle
- › excellent fit to the packaged products

Application

- › household use
- › manual packaging
